

PASSPORT

Bond Building

Passport 1 and 2:

4. Bond-Building Reconditioning Treatment:
We recommend combining 10g/ml (.4oz) of Passport 1 with 15g/ml (.5oz) of Passport 2 and then applying it to the hair. Process for 20 minutes without heat and then shampoo/condition like normal.

Notes

Directions

Passport 1

1. On-Scalp/ Global Lightener Application:

We recommend 3g/ml of Passport 1 for every 10g/ml of Lightener

For example: 60g/ml (2oz) of lightener would require 18g/ml (.5 oz) of Passport 1

2. Balayage and Highlights:

We recommend 3g/ml of Passport 1 for every 10g/ml of lightener

For example: 60g/ml (2oz) of lightener would require 18g/ml (.5 oz) of Passport 1

3. All Hair Color:

We recommend .5g/ml of Passport 1 for every 10g/ml of color

For example: 30g/ml (1oz) of color would require 1.5g/ml (.5 oz.) of Passport 1

For example: 60g/ml (2oz) of color would require 3g/ml (1 oz) Passport 1

- For Passport formulation purposes 1g = 1ml
- All measurements are based on color/lightener without developer.
- Passport is compatible with all color lines
- We DO recommend increasing the developer by one level in order to achieve maximum lift
- Passport 1 and 2 (Demi-Permanent Reconstructing Treatment) can be used on all hair types after every chemical service
